

The current edition of Eurographics offers to the conference attendees a set of augmented reality solutions to give a better information service.

### Eurographics 2013 Augmented Card/Poster

- Follow these steps:
- Install the Layar app on your smartphone. You can do it by scanning the following code:

- Scan the EG2013 card/poster with Layar from anywhere
- Get the augmented information

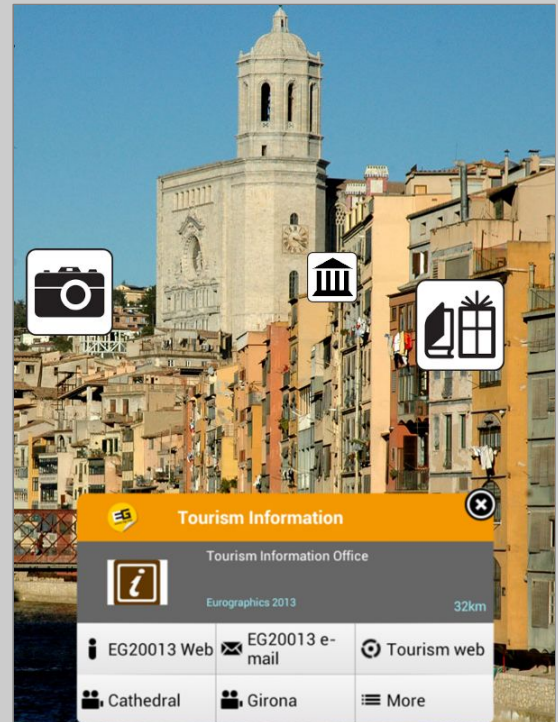

# Eurographics 2013 Augmented GeoLayer

Follow these steps:

- Scan this code to install the Layar app into your smartphone (or to access the content if it is already installed) :

- Point your smartphone to anywhere to see the interesting points at that direction.

- Interact with the interesting points to get maps, info, videos and much more.
- View the interesting points into a 2D map or in a list selecting the list or map menu.
- Filter the data selecting the settings menu.
- Access to the contents without the QR code searching the keyword *eurographics* into the Layar app.
